Exposure of Children to Indoor Molds

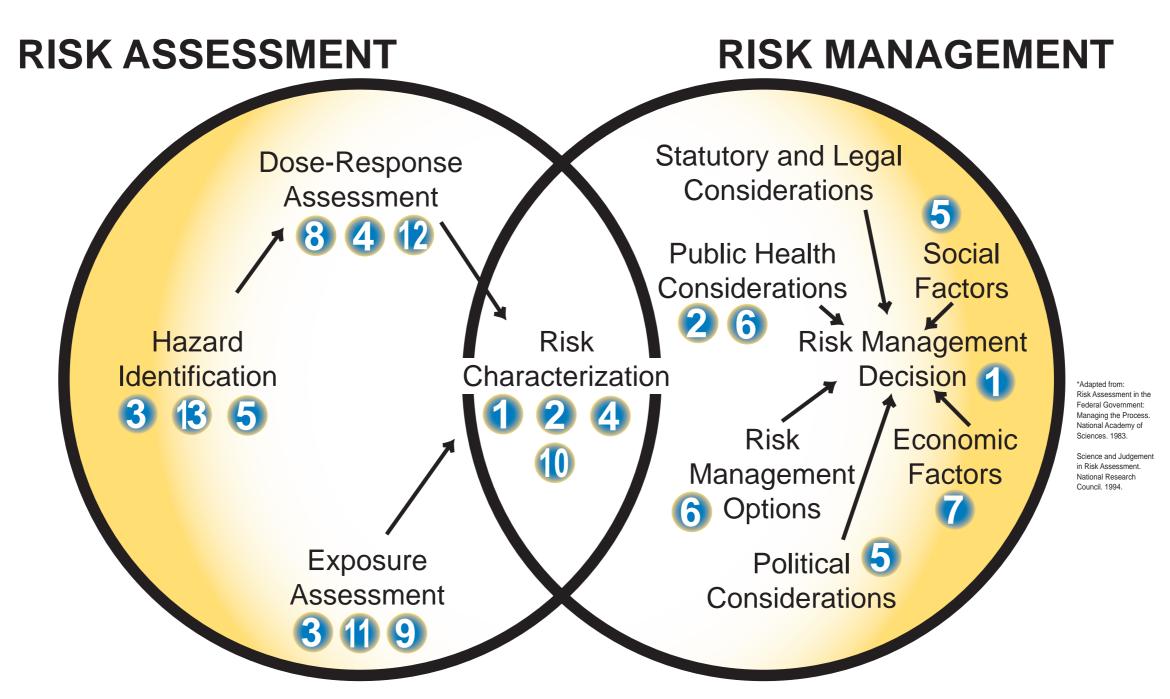

2003-2008 EPA Strategic Plan - Direction for the Future

Objective: 1.2: Healthier Indoor Air*

By 2008, 22.6 Million more Americans than in 1994 will be experiencing healthier indoor air in homes, schools, and office buildings.

The Risk Assessment/Risk Management Paradigm

R & D TEAM WORKING TOGETHER

- Dr. Robert Frederick, NCEA, Washington, DC
- Dr. Ed Furtaw, NERL, Las Vegas, NV
- Dr. Richard Haugland, NERL, MCEARD, Cincinnati, OH
- Dr. Kenneth Hudnell, NHEERL, ND, Research Triangle Park, NC
- Ms. Laura Kolb, OAR, IED, Washington, DC
- Dr. Marc Menetrez, NRMRL, APPCD Research Triangle Park, NC
- Dr. Bruce Macler, Region IX, San Francisco, CA
- Br. Mary Jane Selgrade, NHEERL, ETD Research Triangle Park, NC
- 9 Dr. Jody Shoemaker, NERL, MCEARD Cincinnati, OH
- Dr. Jeanette Van Emon, NERL, HEASD Las Vegas, NV
- Dr. Stephen Vesper, NERL, HEASD Cincinnati, OH
- Dr. Marsha Ward, NHEERL, ETD Research Triangle Park, NC
- Mr. Larry Wymer, NERL, MCEARD Cincinnati, OH

EPA will provide....assistance to address indoor air toxics, such as radon, environmental tobacco smoke, PM, and biological issues, such as mold contamination.

*EPA will broaden awareness and increase action by working with national as well as local community-based organizations to design and implement programs that address critical indoor air quality problems, including radon, secondhand smoke, asthma, and mold contamination in homes, child care and school facilities ...
